Desk-Side Recycling Bin Project

Department of Correction / Westville Correctional Facility

Brief Project Description:

The Desk-side Recycling Bin Project was designed to provide a blue "WE Recycle" container at each office workstation. The available container would promote office paper recycling by providing a way to participate.

- Project Dates: 1/1/03 – 6/30/04
- Location: Westville Correctional Facility 1100 West County Road & State Road 2 Westville, IN 46391
- Contact: Donald Parkes, Business Administrator (219) 785-2511 x4039
- Program Results: The Desk-Side Recycling Bin Project starts at the workstation level. Staff will place all office paper into the blue "WE Recycle" container. The offenders, on a weekly basis, will gather the office paper and sort if necessary. The paper is transported to a designated storage area at the facility. Once a month the paper is transported to the City of LaPorte Recycling Center. The suggestion or advice I have to any other agency who would want to start a similar program, just do it.
